Given the lack of historical data available on the share of the Sub-Fund, launched on July 19th 2017 (less than 5 years), the above indicator has been calculated on a standard asset selection that we would have adopted at the time when the indicator has been computed.

Due to the fact that the Sub-Fund invests in bond funds (UCITS and other UCIs), the risk indicator is set at 4 (medium risk).

However, the risk category shown is not guaranteed and may shift over time while the lowest category does not mean “risk free”. Also you must be aware that historical data is not a reliable indication of the future risk profile of the Sub-fund.

Please note the following risks are materially relevant to the Sub-Fund and are not adequately captured by the indicator:

- Discretionary risk: the discretionary management

- Counterparty risk: the insolvency of any institutions providing services such as safekeeping of assets or other instruments may expose the Sub-Fund to financial loss.

- Operational risk: failures or delays in operational processes may negatively affect the Sub-Fund.
