Risk and Reward Profile

Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The risk and reward category shown is not guaranteed to remain unchanged and that the categorisation of the Sub-Fund may shift over time. The lowest risk and reward category does not mean a risk free investment. Due to the fact that the Sub-Fund invests in a mix of liquid equities and a diversified range of debt securities, the risk indicator is consequently medium (4). However, the risk category shown is not guaranteed and may shift over time while the lowest category does not mean “risk free”. Besides, you must be aware

that historical data is not a reliable indication of the future risk profile of the Sub-Fund. Please note the following risks are materially relevant to the Sub-Fund and are not adequately captured by the indicator:

- Operational risk: failures or delays in operational processes may negatively affect the Sub-Fund;
- Market risk: Price trends are determined mainly by financial market trends and by the economic development of the issuers, who are themselves affected by the overall situation of the global economy and by the economic and political conditions prevailing in each country. Market risk ranges from low to medium-high according to assets allocation.

For further information concerning the risks of your investment, we recommend you to consult the sales Prospectus of the Sub-Fund. It is available at the registered office of the Company and on the website www.selectrasicav.com.
